

MINISTART
Phase Controller
IN 9017

Translation
of the original instructions

- Phase controller for resistive and motor load
- For permanent power up to 300 W
- Interference suppression limit value class B
- LED indication
- Devices available in 3 versions:
 - IN 9017/100: With current interface 4 ... 20 mA and broken wire detection
 - IN 9017/200: With voltage interface 0 ... 10 V
 - IN 9017/211: With voltage interface 0 ... 10 V, U_{min} adjustable, control input for max. output current
- Width: 53 mm

IN 9017/211

Approvals and Markings

Application

- Resistive load
- Infrared heating
- Fan
- Volume compressor

Function

Phase controllers robust electronic units to control the voltage by phase chopping. The Phase chopping angle is adjusted on a control input. (IN 9017/100: 4 ... 20 mA, IN 9017/200: 0 ... 10 V) verstellt.

The variant IN 9017/211 is realised with 0...10V input and voltfree contact input Q1, Q2.

When contact input Q1, Q2 is open the output remains off at 0-3 V. With 3V control voltage the voltage adjusted on potentiometer U_{min} is switched on. When rising the control voltage continuously up to 10 V on the input, the output voltage increases up to AC 230 V. By closing the contact on Q1, Q2 the the output supplies the max. voltage.

Indication

- LED green: Supply voltage is present
 LED yellow
- At IN 9017/100: Permanent on, when control current > 4 mA
 flashes 1 time, when control current < 4 mA (cable break)
 flashes 2 times, when mains frequency is outside limits
- At IN 9017/200: Permanent on, when full voltage on motor is present
 flashes 1 time, when phase gating is active
 flashes 2 times, when mains frequency is outside limits
- At IN 9017/211: Permanent on, when full voltage on motor is present
 flashes 1 time, when phase gating is active
 flashes 2 times, when mains frequency is outside limits
 flashes 3 times, when setpoint < 3 volt and Q₁, Q₂ are open

Notes

If the power semiconductor should be protected against short circuit or ground fault during operation a semiconductor fuse needs to be installed (see technical details). If not the standard line protection fuses must be used. The phase controller must not be operated with capacitive load on the output. To provide safety for people and equipment, only trained staff must work on this unit.

Technical Data

Motor voltage

IN 9017/100:	AC 48 V	±10 %
IN 9017/100:	AC 115 V	±10 %
IN 9017/100:	AC 230 V	±10 %
IN 9017/200:	AC 115 V	±10 %
IN 9017/200:	AC 230 V	±10 %
IN 9017/211:	AC 230 V	±10 %

Nominal frequency:

50 / 60 Hz
Nominal load P_N : 300 W at AC 230 V
 150 W at AC 115 V

Min. power:

Approx. 0.1 P_N

Rated current:

1.3 A

Semiconductor fuse:

Max. 340 A²s

Setting range output voltage

IN 9017/100:	AC 48 V	AC 12 ... 36 V
IN 9017/100:	AC 115 V	AC 29 ... 86 V
IN 9017/100:	AC 230 V	AC 58 ... 172 V
IN 9017/200:	AC 115 V	AC 20 ... 115 V
IN 9017/200:	AC 230 V	AC 40 ... 230 V
IN 9017/211:	AC 230 V	AC U_{min} ... 230 V

Recovery time:

200 ms

Consumption:

1.4 VA

Control input

IN 9017/100:	4 ... 20 mA	$R_i = 82.5 \Omega$
IN 9017/200:	0 ... 10 V	$R_i = 50 \text{ k}\Omega$
IN 9017/211:	0 ... 10 V	$R_i = 50 \text{ k}\Omega$

Q_1, Q_2 , volt free

General Data

Nominal operating mode: Continuous operation

Temperature range: 0 ... + 55 °C

Storage temperature: - 25 ... + 75 °C

Clearance and creepage distance

Rated impulse voltage /
 pollution degree: 4 kV / 3 IEC 60664-1

EMC

Electrostatic discharge: 8 kV (air) IEC/EN 61000-4-2

HF irradiation: 10 V/m IEC/EN 61000-4-3

Fast transients: 2 kV IEC/EN 61000-4-4

Surge voltage

between

wires for power supply: 1 kV IEC/EN 61000-4-5

between wire and ground: 2 kV IEC/EN 61000-4-5

HF-wire guided: 10 V IEC/EN 61000-4-6

Interference suppression: Limit value class B EN 55011

Degree of protection

Housing: IP 40 IEC/EN 60529

Terminals: IP 20 IEC/EN 60529

Housing: Thermoplastic with VO behaviour
 according to UL subject 94

Vibration resistance:

Amplitude 0.35 mm
 frequency 10 ... 55 Hz, IEC/EN 60068-2-6

0 / 055 / 04 IEC/EN 60068-1

Climate resistance:

Terminal designation: EN 50005

Wire connection: 2 x 2.5 mm² solid or
 2 x 1.5 mm² stranded wire with sleeve
 DIN 46228-1/-2/-3/-4

Wire fixing:

Flat terminals with self-lifting clamping
 piece IEC/EN 60999-1

Mounting:

DIN-rail IEC/EN 60715

Weight:

210 g

Dimensions

Width x height x depth: 53 x 90 x 61 mm

Standard Types

IN 9017/100 AC 48 V 75 W
 Article number:: 0062206

IN 9017/100 AC 115 V 150 W
 Article number:: 0058431

IN 9017/100 AC 230 V 300 W
 Article number:: 0065838

IN 9017/200 AC 115 V 150 W
 Article number:: 0065592

IN 9017/200 AC 230 V 300 W
 Article number:: 0058274

IN 9017/211 AC 230 V 300 W
 Article number:: 0059425

Set-up Procedure

1. Wiring of the component according to connection example
2. Adjust required output voltage

Safety remarks

- Never clear fault when the device is switched on
- The user must ensure that the device and the necessary components are mounted and connected according to the locally applicable regulations and technical standards.
- After disconnection of the device dangerous voltages may be sensed for several minutes on the connection terminals caused by filter capacitors.

Attention:

This device can be started by potential-free contact, while connected directly to the mains without contactor. Please note, that the load is not physically separated from the mains. Because of this the load must be disconnected from the mains via the corresponding manual motor starter.

Control Characteristics

IN 9017/200 AC 230 V
